

Sample PDF for Testing BigBird Model

Introduction

This is a sample PDF document created for testing purposes. You can ask questions based on the content in this PDF. Make sure to include questions that relate to the provided information.

Content

The BigBird model is designed to handle long documents by utilizing sparse attention mechanisms. It can process inputs that exceed typical limits of models like BERT, making it suitable for tasks involving long texts.

Conclusion

Testing machine learning models on PDFs is essential for understanding their capabilities and limitations. This document serves as a basic test case for such experiments.
